A must book for veneer lovers

By Tal G. Siegmann

I am a professional woodworker specializing in veneer work. I own a few veneering books. Most of the modern books I own describe the very basic of how to work with veneer, basic marquetry and use of vacuum bag. This book takes the reader to another level. Not only does it provide amazing photos of the author's portfolio, but it explains how to go about creating different works of art with ease.

I became acquainted with Mr. Kopf while watching his DVD. It was immediately apparent to me that he is a master craftsman and a great teacher as well. I had high expectations for the book and after reading it I highly recommend it to anyone interested in veneer work, especially marquetry. The simple approach to explaining how difficult pieces are created gives you confidence and motivation to go out and try it in your own shop.

As a professional woodworker I own many woodworking books, some good, some ... not so good. This one ranks among the best of them.

Stuning book

By Brent G. Longtin

Outstanding book. The photographs are spectacular and there are plenty of them. The author traces the development of marquetry from earliest times through to his own work. There are numerous helpful suggestions for an aspiring wood artist such as how to get an apprenticeship, work with galleries, and build a strong foundation in the craft. There is not much detail about how to actually do marquetry. But there are numerous good books on that such as "A Marquetry Course." Be warned though, if you do marquetry, after reading this book you will want to burn your pieces. I'm debating whether to let my customers know of its existence.
