Simply awful...

By jsmith

It's readily apparent the authors were busy in their clinical careers... so much so that they neglected to spend any time proofreading this book. It's a typical "write some random questions and we'll call it a board review book to make ourselves famous" book by physicians. There are numerous wrong answers to simplistic and redundant questions. There are so many wrong answers that, as one reviewer mentioned, they are often easy to spot; however, in the course of 800+ questions, do you really want to have to recheck answers in textbooks and other sources to verify their accuracy? I didn't appreciate it and wished I had known this prior to using this. In spite of this book, I easily passed the pain boards. Final words of advice: 1. Use a different pain review book (but alas, they all have their faults) and 2. You're better off reading a pain textbook and simple MRI book for the pain boards if you have the time.

Screaming piece of garbage

By PainMaestro

Appalling inaccuracies in many areas. Questions are plain wrong in many areas. I made it 1/10 through the book and found at least 3 wrong answers cited as correct in this text. This thing was clearly not reviewed or edited by anyone academic, and hence can't be trusted. I run a pain medicine lecture program for a fellowship and would never recommend this book.

Full of misinformation

By A. Janze

I don't know how someone could go through the trouble of publishing a book without making sure they had their facts straight first. Here are some examples:

- 1) Baclofen is apparently an alpha 2 agonist
- 2) Neuropraxia is not a demyelinating condition
- 3) Horner's syndrome doesn't cause anhydrosis but does manage to cause both mydriasis and miosis.

So far one out of every 8 questions or so is either misleading, poorly worded, or just dead wrong. And it's not just typographical stuff - the explanations themselves actually spell out the author's ignorance.

Reading this book actually made me angry enough to write this review. That's how much I hate it.
