Amazingly accurate!

By Donna M. Weigel

It was said that this has no depth but I have to disagree. I looked up first and second names and they fit like gloves. Amazing! My friend is a life coach and uses this book for her clients. She also makes gifts for her friends using this book and the meaning of names. Super book. You can better understand a person by this book.

I totally don't believe in any type of astrology or other crazy stuff like that. I must say that I had to eat my words after reading this book. I have no clue how they could be so accurate. It blew my mind. This is a very interesting science, I would love to have some computer guys dump all this information into a computer and calculate the probabilities of such specific information being accurate. I feel stupid even writing this, I have no clue how it could work, but hope somebody does a scientific study and figures it out. Just the fact that something so unbelievable could have any type of scientific merit, really opens up the mind to wonder what else is out there that might be so illogical, but factual.
